

Investigation

Concerning the Your Baby Can Read!: Early Language Development System

The publishers of this product are targeting parents of children with disabilities and say the following:

- The Your Baby Can Read! System is an appropriate tool for teaching infants with **Down's syndrome** and **Autism** to read from a very young age.

Child Learning experts at Harvard, NYU, and Tufts have called these claims false.

If you have purchased the Your Baby Can Read!: Early Language Development System, we want to hear about your experience and possibly get your money back for you.
